GROOVE

 Inkiostro Bianco®
CREATIVE THINKING

linea de ko 2022

La collezione **Groove** coniuga i linguaggi di arte e architettura in una serie di decori su legno di betulla interpretati da Inkiostro Bianco e dallo Studio Lucchesedesign. Design, arte e architettura sono pace e la combinazione dei loro linguaggi applicati all'interior design, aiutano a rendere un ambiente confortevole, funzionale ed esteticamente armonioso: le superfici diventano un elemento d'arredo protagonista.

The Groove collection combines the language of art and architecture in a series of decorations on birch wood interpreted by Inkiostro Bianco and by the Studio Lucchesedesign.

Design, art and architecture are peace and the combination of their languages applied to interior design, contribute to create a comfortable, functional and aesthetically harmonious environment: surfaces become the main furnishing element.

Groove by Lucchesedesign

Una declinazione di tre decori ispirati alle superfici architettoniche che creano un effetto visivo tridimensionale e materico.

Memorie di soffitti a cassettoni, scanalature nel fuso di colonne antiche rivisitati in stile contemporaneo danno vita a superfici eleganti e raffinate.

Groove è l'alternanza di chiari e scuri e sfumature che, in architettura, simulano un ritmo di volumi vuoti e pieni che si susseguono a impreziosire la superficie rendendola un vero e proprio elemento di arredo protagonista all'interno dello spazio.

Lucchesedesign interprets the Groove collection by proposing a series of graphic designs inspired by architectural surfaces that create a three-dimensional and material visual effect.

Memories of coffered ceilings, grooves in the shafts of ancient columns revisited in contemporary style create elegant and refined surfaces.

Groove is the alternation of light and dark and nuances that, in architecture, simulate a rhythm of empty and full volumes that follow one another to enrich the surface, making it a true protagonist furnishing element within the space.

Groove by Inkiostro Bianco

Un sottile disco a due facce compie i suoi 45 giri al minuto mentre la puntina percorre la scanalatura dov'è incisa una magia. Groove è il ritmo scolpito in quel solco. Insieme armonico e sempre unico di immagini raccontate attraverso il suono. Tutti i sensi concorrono alla comprensione di quel "linguaggio" fatto di silenzi, pause e successioni di accordi in perfetta sintonia. Groove è quella scanalatura che rende accessibile a tutti la visione di chi è capace di raccontare un mondo attraverso immagini astratte ma tanto reali da farti provare emozioni tal volta così forti da creare a loro volta un segno indelebile nel profondo della tua esperienza.

A thin two-sided disc makes its 45 revolutions per minute as the needle runs along the groove where magic is engraved. Groove is the rhythm carved into that groove. A harmonious and unique set of images told through sound. All the senses contribute to the understanding of that 'language' made of silences, pauses and chord successions in perfect harmony. Groove is what makes accessible the vision of one who can narrate a world through abstract images that are so real as to make you feel strong emotions and create an indelible mark in the depths of your experience.
