

when art meets light

TERZANI

toward new shapes

Terzani turns light into a sculptural language, an expressive material shaped into a visual language where art, elegance, and experimentation converge. Its creations emerge as suspended luminous sculptures, redefining space through reflections, transparency, and material vibrations.

Each piece is born from a continuous exploration of materials and techniques, often rooted in the language of art and reinterpreted through innovation. Metals, crystals, and surfaces become instruments of expression, giving rise to compositions where light is shaped, fragmented, and transformed.

Crafted through artisanal processes and handmade in Italy, these creations embody the meeting of traditional know-how and a constant drive for experimentation, resulting in unique works at the boundary between design and art.

Genesis, floating knit.

Gianluca Regazzo has woven his vision, inspired by the language of fashion, into the creation of a fabric suspended in mid-air, blending elegance and creativity into an ethereal and timeless form. Genesis combines textile art and illumination, bringing to life a work that emerges from a slender thread of knitted steel. Its organic essence transforms into a visual jewel, capable of refracting light in a delicate balance between lightness and harmony, enchanting those who behold it.

The transparency of the fabric seems to merge with its surroundings, as if breathing in the surrounding space. Its fluid and intricate weave tells a story of textures that dance ceaselessly between imagination and reality. Genesis is a primordial act, the birth of new life shaped by thread, a creation that reveals itself in constant motion. Like an ancient tale taking form, it transforms the fabric into an endless narrative, where each weave and thread gives rise to a new shape. It is a living work, evolving and changing, evoking a flow of ethereal forms in which light merges with matter. Genesis dissolves the boundaries between the tangible and the imaginary, between design and art, celebrating the birth of a new existence. Design Gianluca Regazzo.

Dragon, art's heartbeat.

Dragon represents a new chapter for Terzani: the first piece designed as a standalone brass sculpture, cast at a historic foundry in Tuscany. At Terzani, our creative process benefits from the dialogue created between our history, our creative partners, and our innovative spirit. When creating Dragon, we found that the most powerful expression was not as a lighting design but as a sculptural work of art, one that elevates the artist and harnesses our creative expertise. In Chinese mythology, the dragon is a nature deity central to creation tales. Thus, it makes sense that the latest from designer Dodo Arslan tapped into this powerful, ancient symbolism for his newest creation. In a dramatic rethinking of how rooms are experienced, Dragon is a sculpture designed to not only grab attention but also change how a space is considered. An explosion of liquid metal, tamed by Terzani's Tuscan master craftsmen, Dragon reflects the power of the fires that shaped it and speaks to the connection between earth and water. This handcrafted piece embodies the cyclical dance of the elements while evoking a cosmic harmony. Its presence unites not only a space but those who inhabit it. Each Dragon is a unique, fully customizable, and numbered sculpture. While it imparts the feeling of the natural, organic form, it is a painstakingly crafted piece of art and an ode to the fusion between the creative force of man and nature. Design Dodo Arslan.

When our Argent collection debuted a decade ago, we knew we had created something special. Working with designer Dodo Arslan, our melding of Italian craftsmanship with contemporary design redefined the industry. Ten years later, we are building upon the success of this original collection with a new chapter: Argent, mon bijou.

Argent, mon bijou.

Again, partnering with Dodo Arslan, we asked ourselves: what have we learned from our evolution as designers and craftsmen? How can we make this new collection as daring, beautiful, and innovative as its predecessor? Our answer is a new series of pendant lights and table lamps that draw inspiration from across design: from the fashion of Paco Rabanne, the work of Verner Panton, the mirrored art of Julio Le Parc, and the natural beauty of the Italian seaside. The result is a lamp reminiscent of a shimmering cloud casting brilliant, ethereal light across the room. Handmade by our craftsmen in stainless steel, each piece is both unique and a modular element of an extremely flexible system. Our goal is to give architects and designers the freedom to express their visions without limits, adapt to any environment, and add a touch of magic. Design Dodo Arslan.

Harpe, the sound of light.

The new Harpe collection comes from the childhood memory of its designer, Christian Lava. Like most children, he would look up into the sky and visualize shapes in the clouds as they passed by. His active imagination would run wild with the fantastic things that emerged. One day, Christian looked up into the sky only to see a gray, leaden blanket of clouds. However, against this blank canvas, a break in the sky appeared, and bright sunlight came streaming down in rays reminiscent of a harp. It's the memory of this divine instrument that inspired our latest pendant, Harpe. Made of metal, Harpe is available in three different shapes and sizes, and can be assembled in infinite combinations. Design Christian Lava.

Mizu, flowing light.

Inspired by the tranquil and mesmerizing light refractions created by water, Mizu is a customizable pendant light from Terzani. Like water droplets, no two Mizu are alike; each crystal shape is unique and meticulously handmade. Using only the clearest crystal, Mizu perfectly emulates water's refraction of light, casting amazing patterns around the room, reminiscent of flowing water. Available in clear, silver dust, gold, cognac, and champagne finish. Design Nicolas Terzani.

[illegible]

Manta, shimmering waves.

Manta was created featuring sinuous, undulating lines. The result is soft waves of crystal light reminiscent of being underwater. The innovative Manta is made of crystal, with a dimmable integrated LED lamp focused on maximizing the crystal's reflection. Manta's organic form is available in two sizes and can be installed in numerous, customizable arrangements. Design Dodo Arslan & Nicolas Terzani.

Used for centuries as a tool to both teach and communicate mathematics, the abacus was found in one form or another across the ancient world. At Terzani, we saw the beauty in the abacus' mathematical purity and clean, functional design.

Abacus, multiplying luminescence.

In the hands of Terzani's craftsmen, we've turned this inspiration into a new collection of modular pendant lamps whose flexibility allows for complex and beautiful configurations. Each module, or strand, of Abacus is made of a custom set of round, hand-blown opal glass that emits a soft and uniform light. And, as the original abacus was used to calculate everything from simple addition to complex formulas, we've retained the same scalability. Due to its customization, our Abacus light is just as suitable in a home as in a commercial space, and its almost infinite configurations ensure you always find the right solution. Design Draw.

Capturing the mystery, power, and wonder of the stars, this new floor lamp from Dodo Arslan conjures the natural beauty of space and mankind's fascination with the heavens. Blades of crystalline light travel through a field of stars, creating a deep, rich, and nuanced viewing experience. Stanley's multiple perspectives create a cosmic vision with infinite depth.

Stanley, journey beyond the stars.

An homage to the genius of Stanley Kubrick and his masterpiece, 2001: A Space Odyssey, Arslan's design aims to open doors to new galaxies. By recreating the mysteries of our universe, Stanley captures the sense of awe that continues to compel artists, scientists, and dreamers to look to the sky for answers and inspiration. Staying in accordance with the vibrancy of space, Stanley offers a series of chromatic variations that can be customized, creating a unique, tonal experience. Design Dodo Arslan.

In Greek mythology, Gaia is the personification of the Earth and the mother of all life. Looking to capture the mythical and natural beauty of this Earth goddess, designer Jean-François Crochet has created the Gaia pendant light. Consisting of geometric frames reminiscent of the mountains Gaia created, the pendant uses LED light to push light through the “cracks” formed. The resulting light creates a magical feeling, as if the lights peeking through were alive themselves. Also available in gold, nickel, and wood finish and in custom configurations, Gaia adds a vibrancy and sacred light to any space. Design Jean-François Crochet.

Atlantis, a precious wave.

Seemingly alive, Atlantis's shimmering light creates a vibrant source of energy. Its mesmerizing, organic effect is created by hundreds of illuminated lengths of draped chains. Like water in the ocean, Atlantis's chains appear liquid, cascading over its gloss bands and falling down toward the abyss before turning back into itself. Atlantis is composed of almost five kilometers (three miles) of chain, meticulously hand-crafted by master Italian artisans. Design Barlas Baylar.

Epoque, cyclical light.

Epoque is a light sculpture designed to study chiaroscuro and volumes. The result is a modern expression of these Renaissance-era techniques in a stunning chandelier. Composed of curved, organic lines, Epoque's frame is made of flexible and durable brass metal, suspended by metal chains. Two bands of metal, a central elongated section, and an external band of wide arcs allow the light to envelop a room in reflections of soft light. Epoque has attracted attention from those in the design community with discerning tastes. Epoque is available in nickel, black nickel, bronze, and gold finish. Design Stefano Papi & Saviz Yaghmai.

Volver, breath of new light.

At Terzani, we are fortunate to work with some of the brightest young stars in Italian design. For Volver, designer Diego Bassetti and architect Andrea Panzeri of Studio 14, protégés of Bruno Rainaldi, applied their multidisciplinary approach to create Terzani's first LED suspension light. This geometric design combines thin chains with the latest in LED technology to create a light that is both elegant and modern. A breath of new light, Volver melds technology and art to achieve a new level of luxury. Available in a circular variation. Design Studio 14.

Stream, iridescent light.

Another stunning design from Christian Lava, Stream is an impressive presence in any room. Like Christian's other work for Terzani, Etoile, Stream's design exploits the physical characteristics of the materials used to envelop a room in unique, immersive light. Here, seven kilometers (four miles) of metal chain appear to flow down from the undulating, plated frame. These cascading tiers project streaking, yet tranquil, shadows throughout the room. Design Christian Lava.

Soscik, classic form, modern look.

Terzani continues to reinvent the classics with Soscik, which combines traditional artisan techniques with cutting-edge technology to give the traditional chandelier a modern update. Created by interlacing metal chain over the frame, Soscik creates a dramatic and romantic effect while still complementing today's modern luxury. Available as a chandelier or a ceiling lamp, Soscik proves that modern design does not have to sacrifice luxury. Design Nicolas Terzani.

Doodle, freehand design.

We no longer march in a straight line. Our lives are dynamic, intertwining collections of relationships, experiences, and journeys. Reflecting the fluidity of our generation, designer Simone Micheli has created a new, contemporary light for Terzani, Doodle. Like us, each Doodle is unique; each pendant is handcrafted by artisans to resemble a randomized path. And, to give us control over the journey we want to take, each LED bulb can be placed anywhere on the light, not only reflecting the choices we make in life, but also giving Doodle special flexibility. Available in nickel, black nickel, gold, and copper plated finishes. Design Simone Micheli.

Core, eruption of light.

Core, designed by Christian Lava, is reminiscent of the natural energy at the heart of our world. Like bright lava seeping through the earth's crust, vibrant spheres of faceted glass break through the iron surface of this pendant. Forcing light to pass through this metal structure results in a powerful, vibrant exchange of forces; light and shadow erupt across the room, and the LED light pours through, as the light itself emits an organic radiance. Available in nickel, black nickel, and gold plated finishes. Design Christian Lava.

Calle, perennial elegance.

At Terzani, we spend countless days searching the globe for talented new designers, but sometimes they find us. Such is the case with the young designers Luca Martorano and Mattia Albicini (Draw), who approached us with the design for Calle, a fantastic new light we instantly fell in love with. It showcases our skill at crafting crystal, taking the material to an exciting, modern place. Luca and Mattia worked with our craftsmen to create a slender inverted flute of crystal that, like the calla lily it mimics, can be grouped into stunning bouquets of light. Design Draw.

Angel Falls, cast down to earth.

For his work with Terzani, Nigel Coates, well known for his unorthodox approach to design, has created an engaging, unique light. Customizable groups of handmade crystal “angels” are illuminated by halogen or LED lamps. What caused these angels to fall from the heavens? It’s up to the viewers to decide. Either way, Angel Falls is sure to garner attention and generate conversation in any setting. Design Nigel Coates.

Oscar, a tribute.

The great Brazilian architect Oscar Niemeyer once said about his work: "It's not the right angle that attracts me, nor the straight line: stiff, inflexible, created by men. What really attracts me is the free, sensual curve. The curve I see on the sinuous course of our rivers, on the clouds in the sky, on your favorite woman's body. The universe is entirely made of curves." Inspired to pay tribute to one of the founders of modern architecture, designer Dodo Arslan has created a series of lights named "Oscar", which pay homage through their adoption of Niemeyer's signature sensuous curves. Oscar table lamp consists of a glass orb delicately held by curved brass. Available in nickel, brass, black, white, gold plated, and rose gold finish. Design Dodo Arslan.

Moiré, movement with pattern.

A French term derived from silk with a rippled or “watered” appearance, moiré is an optical effect that results in the illusion of waves or the movement of water. This effect is achieved by having an opaque, ruled pattern overlaid on another. Designer Christian Lava’s studies of this effect have led to his latest design, aptly titled Moiré. Using overlapping grids of metal, this LED pendant light dynamically changes shape, following the viewer’s gaze, practically coming to life with a vibrating energy. Moiré is a mesmerizing addition to any room. Available in gold plated and nickel finish. Design Christian Lava.

Iceberg, pure light.

Inspired by the natural beauty of ice crystals, this new suspension light creates a spectacular, luminous piece through the use of over 4,086 plexiglass tubes. Similar to light refracting through water, the illumination created by Iceberg is both brilliant and natural. Meticulously handcrafted, each light is a unique sculpture: sparkling, multifaceted, and powerful. Design Dodo Arslan.

Frame, nature's imprint.

Capturing a moment in time, Frame features a metal coral leaf enclosed inside borosilicate glass, preserving a delicate imprint of nature. Hidden inside is a single bulb that glows from within. This creates a stirring light that projects a dynamic shadow due to the permeable coral. Frame is available in white, gold plated, or silver plated. Design Terzani Lab.

Etoile, twinkling in an indoor sky.

Etoile's intricate network of intersecting nickel lines recalls constellations in a clear night sky. Strategically placed bulbs cast a starry light, twinkling as viewers move around the pendant. By projecting these complex patterns throughout the room, Etoile casts a heavenly glow in any space. Design Christian Lava.

Etoile available with LED light source on request. Different dimming options on request.

Since the beginning, Terzani has always viewed aesthetics as a way of interpreting natural and artistic beauty. Founded in 1972 in Florence, Italy—the cradle of the Renaissance—the company was compelled to follow the creative invocations of the city. The word “aesthetics” originates from the Greek “aisthesis,” which means “feeling” or, more precisely, knowledge created by the use of one’s senses. When you look at a Terzani design, you can sense how its light enchantingly envelops the surrounding space. It’s more than simply a practical, utilitarian design; it’s an aesthetic that represents modern and artistic beauty through the use of design and innovative technologies.

Intersection of art, luxury and design

Terzani creations are always inspired by the dialogue between the company and the designers themselves. The pieces are born from a compelling feeling that Nicolas articulates to his designers. This inspiration can be a shape that exists in nature, as seen with the fish that inspired “I Lucci Argentati,” the stones or drops of water that inspired “Mizu,” or a material or working method that attracts his attention. With the team of designers who work with the company, a project will be executed with all the necessary technical diligence, but the starting point that defines any Terzani light is always a feeling.

To create a style like the one we at Terzani have established, you need to balance several characteristics. Terzani is elegant and sophisticated, innovative yet original. It uses the latest technology, but also incorporates fine materials crafted in a very artisan way. Each lamp is an object or sculpture meant to be fully integrated into its surroundings, spreading a charming and enchanting play of light. This creates an ever-changing dialogue between the lamp and the space around it. The feeling that Terzani exudes is one of harmony and togetherness. Its products are grounded in the human process, transmitting the handmade artisan traditions of lovingly crafting objects piece by piece. This is the essence of Terzani, which sees beauty in the contemporary world, tradition, and the search for new forms and languages. Terzani continues to redefine the way luxury lighting is designed and produced. Through experimentation with new production methods and forward-thinking ideas, it has become known for designs that use sculpture, light, shadow, and motion to reshape spaces. These handmade products sit at the intersection of art, luxury, and design. Following Terzani’s artisan tradition, each “lighting sculpture” continues to incorporate traditional methods of processing glass and metal, along with giving individual attention to every detail.

These designs are brought forth through the dialogue between Terzani and some of the world’s most renowned designers. Terzani is proud to work with such talented artists as Dodo Arslan, Barlas Baylar, Jean-François Crochet, Nicolas Terzani, Nigel Coates, Christian Lava, Studio 14, Draw, Simone Micheli, Stefano Papi & Saviz Yaghmai, and others, to create the company’s original style.

TERZANI

All products in the Terzani collections are inspired by a return to noble artisan traditions. Every object is carefully created using craft techniques, and for this reason, certain details may vary from product to product. These variations are not imperfections but characteristic peculiarities of the production process. Terzani reserves the right to modify its products in order to improve their features. Product reproduction on paper may result in a misrepresentation of some colors. For updated technical data, please refer to our current price list or spec sheets available at terzani.com.
